Simple Document Test

This is a simple one-page document designed to test Johnny5's basic parsing capabilities.

Basic Text Processing

This section contains regular text with **bold formatting**, *italic text*, and underlined content. Johnny5 should be able to parse these elements correctly.

List Processing

Here are some bullet points:

- First item with important information
- Second item with **bold text**
- Third item with *italic emphasis*

Numbered Lists

Here's a numbered sequence:

1. First step in the process
2. Second step with **key information**
3. Final step to complete the task

Code and Technical Content

This section contains code-like content:

```
def process_document(pdf_path):  
    return parse_pdf(pdf_path)
```

Conclusion

This simple document tests Johnny5's ability to parse basic text elements, formatting, and structure without complex layouts or tables. | Bad | Table |
